

State of Idaho Certificate for the Microbiological Analysis Of Drinking Water Teton County Water Laboratory

460 E. Pearl St.
Jackson, WY 83001
EPA ID: WY00934

Based on the most recent assessment; proficiency testing results; and continuing compliance with the Fifth Edition of the "Manual for the Certification of Laboratories Analyzing Drinking Water" with addendums and IDAPA 16.02.13, Teton Count Water Laboratory is granted reciprocity with the State of Idaho for environmental monitoring under the Safe Drinking Water Act and is authorized to perform the following methods for the analytes listed.

SM9223B Enzyme Substrate (Colilert-18®) Presence/Absence Total Coliform and *E. coli*
SM9215B Heterotrophic Plate Count – Pour Plate

Teton Count Water Laboratory will retain reciprocity with the State of Idaho until July 2017 as long as Teton County Water Laboratory maintains certification with the Environmental Protection Agency Region 8 Certification Authority.
